

## **June 26-30, 2022** Istanbul Congress Center, Istanbul, Turkey

### Track 8: Fuel Cells: SOFC and other types

### Track Coordinator: Meng Ni (meng.ni@polyu.edu.hk)

## **DESCRIPTION OF THE TRACK**

WHEC-2022 is a multidisciplinary international conference hosted by the International Association of Hydrogen Energy. The conference will offer both onsite and online presentations and exhibitions. In this track, authors are cordially invited to submit their extended abstracts in the field of Fuel Cells: SOFC and other types. Some key topics are listed here as a guide for the authors. The authors should submit their extended abstracts with a choice for either oral or poster presentations.

# **KEY TOPICS**

#### (Topics include but not limited to the following)

- Materials for SOFC cell components (Anode, cathode, and electrolyte)
- Fuel flexibility of SOFCs
- Protonic ceramic fuel cells
- Modeling of fuel cells
- Advanced cell/stack designs
- Solid oxide electrolysis cells (H2 production, CO2 reduction, synthetic fuel production)

#### Prototypes, field tests, cost analysis

- Combined heat and power cogeneration systems
- Direct carbon fuel cells
- Microbial fuel cells
- Direct methanol fuel cells/Direct alcohol fuel cells
- Fuel cell applications

Important Dates	Extended abstract of Notification of abstra		December 15, 2021 February 15, 2022
